About Me

Software Developer and IT professional who builds full-stack web platforms, business systems and data-driven tools that solve real problems, from factory queue management and e-commerce to telemedicine. Skilled in React, TypeScript, Node.js, PHP (Laravel), Python (Django, Flask) and PostgreSQL, with experience in data analysis, machine learning, SEO and digital analytics. BSc in Information Technology (Second Class Upper) and Diploma in IT (Distinction) from JKUAT, focused on practical solutions that automate workflows and improve how businesses run.

WORK EXPERIENCE

February 2026 - Present (On-site)

GoldVein Solutions Ltd

SAP Consultant / Software Developer

Implement, customise and troubleshoot SAP Business One for clients, write SQL queries and build Crystal Reports for business reporting, and handle database management, system integration and technical support. Developed and implemented Q-Sync, a queue management system for Golden Africa Djibouti SARL's truck loading operations, digitising bookings, manager approvals, SAP numbers, QR gate tickets and a live loading queue, with role-based consoles, a REST API and an SAP integration API, and supported its rollout on-site in Djibouti.

November 2025 - January 2026 (Hybrid)

Avané Dermatology Clinic

SEO & Digital Systems Associate

Developed, maintained and optimised website pages for performance and speed; implemented on-page and off-page SEO, including e-commerce optimisation; built high-converting landing pages and managed digital marketing campaigns; and set up analytics tracking with GA4, Google Tag Manager, Meta Pixel and Google Ads tags.

SKILLS

- Web Development
- SAP Business One, Crystal Reports & Microsoft Dynamics NAV
- System troubleshooting, software installation & configuration, network setup, cloud applications and IT user support
- Front-end – HTML, CSS, JavaScript, TypeScript, React, Vue.js, Tailwind CSS, Bootstrap
- Back-end – Node.js, Express, PHP (Laravel), Python (Django, Flask), Java
- API integration – REST APIs, FastAPI, Python requests, Fetch, Axios, JWT auth
- Databases – MySQL, PostgreSQL (Neon), SQLite, SQL, Drizzle ORM
- Data & machine learning – Power BI, PySpark, MLlib, Pandas, Matplotlib, Seaborn
- SEO & analytics – GA4, Google Tag Manager, Meta Pixel, Google Ads
- Brevo & Klaviyo – Email Marketing
- Hosting – Vercel, Hostinger, Linux

LANGUAGE

English
Swahili

October 2025 - November 2025

One World Leadership Institute Africa (OWLI Africa)

Research & UI/UX Developer

Conducted user research and contributed to the UI/UX design and development of a Learning Management System for vulnerable families with University of Maryland students, focusing on accessibility and intuitive learning that improves digital inclusion.

May 2024 - August 2024

Bright Innovations Limited

Web Developer

Gained hands-on experience in system development, UI design and back-end implementation, and supported clients with troubleshooting and roll-out of Microsoft Dynamics NAV solutions.

May 2023 - August 2023

JKUAT Internal Attachment

Mobile Developer

Built Android applications integrated with back-end systems.

September 2022 - December 2022

Ministry of Petroleum and Mining

Assistant IT Consultant

Supported hardware, web development and networking tasks.

PROJECTS

Elite Online Hospital – telemedicine platform with scheduling, secure messaging and video consultations (React, Node.js, PostgreSQL, WebRTC).

Kenbel Finds – e-commerce store with search, wishlist, cart, checkout and an admin dashboard (React, TypeScript, PostgreSQL).

ShuleTrack – classroom management app for Kenyan teachers covering attendance, marks and timetables (React, Express, PostgreSQL).

COVID-19 Capacity Prediction – Hadoop and PySpark big-data pipeline with MLlib models predicting spread and hospital capacity.

Green Guard – AI web app that detects plant diseases from leaf images and recommends remedies (Next.js, deep learning).
